

Message From The President

I welcome you as a new employee of Moraine Valley Community College. Moraine Valley is committed to providing every possible opportunity to help our employees become successful in their positions at the college. One means of doing so is to involve you in our New Staff Mentoring Program.

The value and purpose of the program is to help new colleagues transition into their jobs, to improve overall employee workplace satisfaction, and to provide you access to someone who can assist you with learning about the college and its culture. Our experience has shown that this mentoring program contributes to promoting diversity, connects employees with others in the institution, opens lines of communication, and helps new employees avoid potential obstacles and difficulties they may face.

So, I encourage you to look to your mentor as someone who will answer your questions or point you in the right direction to get them answered; as a person who will listen to your concerns and provide confidential feedback; and as a fellow employee who can provide both formal and informal opportunities to network and grow in your new position.

It is our hope that the New Staff Mentoring Program serves as another resource to welcome you to Moraine Valley and to help you achieve success transitioning into the college.

Dr. Sylvia M. Jenkins
